

SHAF MANZUR

U.S CITIZEN | 917-705-6598 | smanzur@buffalo.edu | New York, NY | <https://shaf-manzur.github.io/>

EDUCATION

University at Buffalo, SUNY

Buffalo, NY

Bachelor of Science in Computer Science

May 2026

- Relevant courses: Discrete Structures, Data Structures and Algorithms, Systems Programming, Computer Organization, Algorithms and Complexity, Linear Algebra, Programming Language Theory, Web Applications

EXPERIENCE

Software Engineer Intern

June 2024 – Aug 2024

DevelopForGood

- Implemented **advanced filtering** (date ranges, program, region, partner type) in the admin dashboard
- Delivered **one-click exports** (CSV/PDF/XLSX) that automatically generate polished reports in minutes without customer support, letting staff stay focused on program work.
- Developed and implemented a **modal system** for 15+ team and board member profiles, and optimized image loading, reducing landing page load time by approximately 33%
- **Refactored** JavaScript codebase, decreasing code complexity and improving future maintainability

Android Developer Intern

March 2023 – May 2023

Nassau Community College

- Implemented **REST API** calls for guests checking in, **increasing throughput by 100%** during peak hours
- Applied **AGILE** principles, scrum/sprints, and weekly standups
- Collaborated with the administration of Nassau Community College, incorporating specified requirements

PROJECTS

Claude-Tokenizer | Next.js, TypeScript, Anthropic API

- Built a token counting application and scaled to **6,000+** monthly users
- Enabled users to count tokens of images and documents by extending support for base64 media and file parsing

Fanart Gallery Website | Typescript, Next.js, Tailwind, DrizzleORM, Postgres

- Engineered a full-stack fan-art platform, **modelling a database with PostgreSQL** to serve artwork, user profiles, and a **gamified points system** with minimal latency
- Launched engagement features (**favorites, comments**) driving traffic and repeat visits

AI Vector Graphics Generator | Typescript, Next.js, Tailwind, Vercel AI SDK, Fal AI

- Built a webapp to convert natural-language prompts into brand-consistent SVG icons, logos, and illustrations
- Developed a utility to transform any logo into radially symmetric patterns, **automating processes** previously done manually by designers

Claude and ChatGPT Export Viewer | Typescript, Vite, React.js

- Developed an app that transforms raw Claude/ChatGPT exports into an **intuitive dashboard**, enabling non-technical users to quickly navigate and review conversations without installing complex tooling

Community Life Alert System | Next.js, TailwindCSS, Supabase, Figma, OAuth

- Winner of HackPSU 2024 **Best React Hack** out of 150+ hackers

SKILLS

Languages: Java, Javascript, HTML/CSS, C, Python, SQL, PostgreSQL, Bash

Frameworks: Next.js, React.js, Node.js, TailwindCSS, Express.js, MongoDB, Firebase

Tools: Git, Figma, Linux, Vercel AI SDK, Fal AI, DrizzleORM, Postgres, Neon, Supabase, Make, Valgrind

Concepts: Frontend, Backend, OAuth, REST APIs, AGILE, CI/CD, Unit/Integration testing
